So the Saturn is called karma karaka who also signifies one’s employment, job nature or business etc., We use to analyse one’s profession in a horoscope from 10th cusp. 1. Introduction

Employment is essential in every one’s life. Nowadays, most courses are selected based on trending job opportunities. Only a few people choose courses according their passion. Some people, even after completing their education, are not willing to do job. Therefore, working in a job, doing business, mediating, coaching, forming etc., are different sources of earning. To find out these aspects, Indian astrology play an important role.

2. The Role of Indian Astrology

Indian Astrology takes into consideration of cuspal (Bhava karakas) significations and planetary significations to study the various events in life. Particularly, to study one’s profession or career in traditional Parashara method, we analyze that 10th bhava for profession, the 6th bhava for employment or service, the 2nd bhava for sources of income and the 11th bhava for fulfilment of desires. Along with these, planetary significations (Graha karakatwas) also studied, and finally a conclusion is drawn about the kind of profession is likely to pursue.

3. Brugunandi Nadi

“Brugunandi Nadi” is a type of predictive system followed in Indian Astrology. It has it’s own set of rules for making predictions. To determine one’s profession, this Nadi system mainly considers the planet Saturn, which is known as the KARMA KARAKA. Through Saturn, the native’s profession can be identified.

4. Basic Rules in Brugunandi Nadi regarding Profession

1. The sign in which Saturn is placed and the nature of that sign- movable, fixed or dual, as well as fire, earth, air or water should be noted.
2. If the sign lord of Saturn is strong, the profession will also be strong.

3. Strong planets connected with Saturn indicate their related professions.
4. Weak or inimical planets connected with Saturn disturb the profession.
- 5 a) Planets placed in the 1st, 5th and 9th position from Saturn exert 100% influence.
b) Planets placed in the 3rd, 7th and 11th positions from Saturn exert 75% influence.
c) Planets placed in the 2nd and 12th positions from Saturn (on either side of Saturn) exert 50% influence.
6. If Saturn is in retrograde motion, it is assumed to be placed in the previous sign. For example, if Saturn is in retrograde in Mesha Rasi, it is considered to be also in Meena Rasi.
7. If planets exchange their signs(parivarthana), they are considered to be placed in their own signs.

- Saturn is in retrogression. So he is in Scorpio and also considered in Libra. From Scorpio the sun is in 5. The combination of Saturn and Sun indicates government job.
- From Libra, Mercury and Jupiter are placed in 5th house. The combination of Saturn , Sun, Mercury and Jupiter indicate government teacher.

Some Nadi astrology principles mainly consider the position or status of Saturn, as well as the planets connected with Saturn, to predict a person's profession without taking the 10th cusp into account. However, in practice, it is often very difficult to arrive at a definite conclusion using this method alone.

Similarly, even when we analyse profession or employment through the 10th cusp and its related planetary significations, we may still be unable to reach a clear decision. In such cases, a conclusion can be drawn by considering Saturn as the *Karma Karaka*. Therefore, Saturn can be regarded as a testing tool for determining profession according to Nadi principles.
